

# SAKSHI PAL

Data Analyst | Python | SQL | Excel | Power BI

+91-7982642410 | sakshipal9953@gmail.com | Sakshi Pal | SakshiPal9953 | Portfolio

## PROFILE SUMMARY

Data analyst with hands-on experience building Power BI dashboards, writing SQL queries, and analysing datasets of up to 900K+ rows. Skilled at cleaning messy data, identifying trends, and turning findings into clear visuals that help stakeholders make faster decisions. Currently completing a B.Tech in Computer Science (Data Science) and actively seeking a full-time data analyst role.

## WORK EXPERIENCE

**Data Analytics Intern** | *DeepThought CultureTech Ventures Private Limited* Dec 2025 - Feb 2026

- Built interactive Power BI dashboards to track core KPIs — reduced time spent on weekly reporting by automating data refresh workflows.
- Analysed customer engagement datasets to surface growth trends and drop-off points, presenting findings directly to the management team.
- Wrote Python scripts to automate repetitive data processing tasks, cutting manual effort on routine reporting by an estimated 40%.

**Data Analyst Intern** | *CRC Department, ABESIT* June 2025 - July 2025

- Cleaned and normalised 10,000+ logistics records in SQL and Excel, resolving data inconsistencies that had caused reporting errors.
- Designed a Tableau dashboard mapping accident hotspots by geography and severity — identified 3 high-risk zones that informed departmental safety recommendations.
- Used calculated fields and parameters to make dashboards self-service for non-technical stakeholders, reducing ad-hoc query requests.

## PROJECTS

**Quick Commerce Operations Optimization** | *Power BI, DAX* GitHub

- Analysed ~900K rows of order fulfilment data to measure delivery partner efficiency, order weights, and route latency by region.
- Built DAX measures for rolling averages and partner SLA compliance — pinpointed 2 regional warehouses causing 60%+ of late deliveries.
- Dashboard adopted by project stakeholders as a live monitoring tool for supply chain performance.

**Dynamic Job Market Analytics Platform** | *Python, Streamlit, Plotly* Live App | GitHub

- Built a web app that scrapes and visualises demand for tools like SQL, Python, and Power BI by location — helped peers identify high-demand skill gaps.
- Automated data aggregation with Pandas, enabling real-time filtering by role and city across 500+ job listings.

**Bank Loan Risk Evaluation Engine** | *Python, Pandas, NumPy, Matplotlib* GitHub

- Cleaned historical loan data and analysed correlations between credit score, income, loan amount, and default rates.
- Produced visual trend analysis that clarified which borrower segments carried highest default risk, supporting lending policy review.

**Road Accident Geospatial Assessment** | *Tableau Desktop* GitHub

- Extracted patterns from 10,000+ accident records across weather conditions, road types, and time of day.
- Designed clean interactive dashboard filters to highlight immediate local safety risks and seasonal accident spikes.

## SKILLS

**Technical Skills:** Python (Pandas, NumPy, Matplotlib) | SQL (MySQL, PostgreSQL) | Excel (Pivot Tables, Power Pivot) | Tableau | Power BI (DAX, Power Query, Data Modeling) | Streamlit

**Competencies:** Data Cleaning & Data Preprocessing | Exploratory Data Analysis (EDA) | Data Visualization | Dashboard Design | KPI Tracking | Business Analysis | Statistical Analysis | AI/ML Fundamentals

## EDUCATION

**ABES Institute of Technology (AKTU), Ghaziabad** 2022 – 2026

*B.Tech in Computer Science and Engineering (Data Science)*

**Saraswati Vidya Mandir (CBSE)** 2021 – 2022

*Intermediate (PCM)*

**Saraswati Vidya Mandir (CBSE)** 2019 – 2020

*High School*

## CERTIFICATIONS & ACHIEVEMENTS

- Cisco – Data Analytics Essentials
- Winner – Hack-o-Verse Hackathon, ABES College
- Runner-Up – Galgotias International Hackathon, GCET
